SLABBINCK XTREME

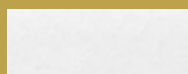

Naast onze topkwaliteiten bieden we drie extreme kwaliteiten aan: een satijn 1010TC, een satijn 700TC Giza 45 en een pima perkaal 800TC.
En plus de nos qualités supérieures, nous offrons trois qualités extrêmes: un satin 400 fils, un satin 275 fils Giza 45 et un percale Pima 351 fils.
In addition to our top quality fabrics, we offer three extreme qualities: a 1010tc satin, a 700tc Giza 45 satin and a 800tc Pima percale.

MAIKA Satijn | *Le satin* | Satin 1010TC

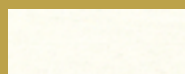

Een 1010TC stof kan enkel geweven worden met garens gemaakt van de fijnste vezels, dit om zo'n hoog aantal garens per vierkante inch te bereiken, en om tegelijk toch de uiterst zachte en soepele touché te behouden. Deze stof heeft een zijdeglans en voelt steviger aan dan een 300TC of 600TC.

Un tissu 1010TC ne peut être tissé qu'avec des fils fabriqués à partir des fibres les plus fines, pour obtenir un nombre de fils par pouce carré aussi élevé, tout en conservant la touche extrêmement douce et souple. Ce tissu a un lustre satiné et se sent plus ferme qu'un 300TC ou un 600TC.

A 1010tc fabric can only be woven with yarns made from the finest fibers, to achieve such a high number of yarns per square inch, while still maintaining the extremely soft and supple touche. This fabric has a satin gloss and feels firmer than a 300tc or a 600tc.

MELLOR Satijn | *Le satin* | Satin 700TC

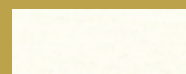

Giza 45 katoen is de allerbeste katoenvazel die er bestaat. Giza katoen wordt alleen op geselecteerde gronden in de Nijlvallei gekweekt en met de hand geplukt en verwerkt. De uiterst fijne, lange en gelijkmatige vezels geven een uniek zijdezacht gevoel en glans. Dit is de crème de la crème van het katoen.

Le coton Giza 45 est la meilleure fibre de coton qui existe. Le coton de Giza est cultivé sur des terres sélectionnées dans la vallée du Nil et cueillies et transformées à la main. Les fibres extrêmement fines, longues et uniformes donnent une sensation et une brillance soyeuses uniques. C'est la crème de la crème du coton.

The Giza 45 cotton simply is the best cotton fiber that exists. Giza cotton is grown on selected grounds in the Nile valley and hand-picked and processed. The extremely fine, long and even fibers give a unique silky feeling and shine. This is the crème de la crème of the cotton.

LUKSA Perkaal | *La percale* | Percale 800TC

Een percale stof met de zachtheid en glans van een satijn stof, dat wordt bekomen door het gebruik van Pima katoen vezels. Pima katoen wordt enkel in Amerika geteelt en wordt gekenmerkt door lange, sterke en zuivere vezels. In onze 800TC Luksa stof worden gedubbelde draden gebruikt wat de stof een zacht aanvoelen geeft maar toch het typische krakerige gevoel van perkaal katoen.

LUKSA est une magnifique Percale de Coton PIMA, dont l'extrême longueur des fils lui confère une finesse et un soyeux sans égal. Ce coton PIMA 800TC est considéré comme l'un des plus qualitatifs au monde.

This percale embodies the softness and shine of satin, which is made possible by using Pima cotton. Pima cotton, cultivated exclusively in the United States, is characterized by the length, strength, and purity of its fiber. Our 800Tc Luksa fabric combines the softness of a two-ply fabric with that typical crispness of a percale.
